Email, Communication and Collaboration Guide

This guide covers Outlook email setup, Microsoft Teams, Zoom, SharePoint, and corporate communication best practices.

1. Outlook and Email

1.1 Outlook Initial Setup

- Open Outlook, File, Add Account, enter your company email user@company.com, click Connect.
- Outlook will automatically detect Exchange server settings. No manual server configuration needed.
- If auto-discovery fails: Server mail.company.com, Port 993 (IMAP/SSL) or 587 (SMTP/TLS).
- Mobile email: download Microsoft Outlook app, Add Account, Office 365, enter company email plus MFA.

INFO: Use the Microsoft Outlook app on mobile, not native iOS Mail or Android Gmail app for corporate email.

1.2 Not Receiving Emails

- Check internet and VPN connection.
- Check Junk Email folder. Emails from new senders often land here.
- Send a test email to yourself to verify sending and receiving works.
- Check if Outlook is in Working Offline mode: Send/Receive tab, verify Work Offline is not highlighted.
- Rebuild Outlook profile: Control Panel, Mail, Show Profiles, Add a new profile.
- Check email quota: File, Info, Mailbox Settings. If near 50 GB, archive old emails to Online Archive.

1.3 Email Sending Limits

- Max recipients per email: 500.
- Max emails per minute: 30.
- Max email size including attachments: 25 MB.
- For large file sharing: use OneDrive or SharePoint links instead of email attachments.
- For mass communications: use HubSpot (the approved email marketing tool). Do not use Outlook for bulk mail.

1.4 Email Archiving and Retention

- Emails older than 2 years are automatically moved to the Online Archive.
- Access archive: Outlook, scroll down in left panel to Online Archive folder.
- Retention policy: archived emails are kept for 7 years for compliance purposes.
- Do NOT manually delete archived emails as this may violate legal hold policies.

2. Microsoft Teams

2.1 Teams Organization

- Request to join a team: Teams app, Join or create a team, search for the team, Request to join.
- Create a new team: requires manager approval. Submit request via IT portal.
- Channel naming convention: use Department-Function format. Example: ENG-Backend, MKT-Campaigns.
- Use @channel to notify all channel members. Use @team for the entire team. Use sparingly.

2.2 Teams Meetings Best Practices

- Schedule meetings via Outlook Calendar. Teams meeting link is added automatically.
- Test audio and video before important meetings: Teams, Settings, Devices, Make a test call.
- For large meetings over 50 participants: use Teams Live Events or Webinars mode.
- Always inform participants before recording a meeting.
- Recordings are saved to the organizer's OneDrive for personal meetings, or SharePoint for channel meetings.

2.3 Teams Calling

- Teams Phone is enabled for all employees. Dial external numbers directly in Teams.
- Your Teams phone number: click Calls in Teams to view your number.
- Voicemail: click Calls, then Voicemail. Set greeting via Calls, Configure voicemail.
- Transfer calls: during a call, click the three dots, Transfer, enter recipient name or number.
- For international calling: submit an international call access request via IT portal (manager approval required).

3. Zoom

3.1 Zoom Account Setup

- Sign in at: https://company.zoom.us using SSO login through Okta.
- Do NOT create a personal Zoom account with your company email.
- Download the Zoom desktop client from the Software Center.

3.2 Common Zoom Issues

- Audio echo: only one person in the same room should have Zoom open with speakers. Others use headsets.
- Video not working: Zoom, Settings, Video, select correct camera.
- Host has another meeting in progress: the host's previous meeting ran over. Wait a few minutes.
- Security: enable Waiting Room and Require authentication to join for sensitive meetings.

4. SharePoint and Intranet

4.1 Accessing SharePoint

- URL: https://company.sharepoint.com. Sign in with your Microsoft 365 account.
- Browse department sites from the SharePoint home page.
- Company Intranet (news, policies, forms): https://intranet.company.com

4.2 File Sharing Best Practices

- Share files via OneDrive or SharePoint links. Avoid email attachments.
- Set link expiry to 30 days maximum for external sharing.
- Use View only permission for general sharing; Edit only when collaboration is needed.
- Never share CONFIDENTIAL or RESTRICTED files with Anyone with the link option.
- Revoke access when no longer needed: File, Manage Access, Remove access.

5. Calendar and Scheduling

5.1 Calendar Sharing

- Share calendar: Outlook, Calendar, Share Calendar, select colleague, set permissions.
- Recommended: Can view when busy for general sharing; Can view all details for assistants.
- Book meeting rooms via the Room Finder in Outlook Calendar: select Building, Capacity, and time slot.

5.2 Out-of-Office Setup

- Outlook: File, Automatic Replies, Send automatic replies, set date range and message.
- Set separate replies for internal colleagues and external contacts.
- Include your return date and an emergency contact name and number.
- Update Teams status: click profile photo, Set status message, include return date.
